COMPANY INFORMATION

Emergent Medical Technologies International, LLC, also known simply as "E.M.T." began in 2006 to serve the ever-increasing number of medical professionals in the southwest United States. Based in Las Vegas with a world-class instruction staff, and multiple diverse training locations, EMT quickly became a trusted leader in EMS education.

Medical Director:

Bryan Bledsoe, DO, FACEP

Managing Directors:

James Mitchell

Susie Kochevar, RN

Clinical Committee:

Bryan Bledsoe, DO

Wade Sears, MD

Susie Kochevar, RN

Patricia Beckwith, EMT-P (Military/LE Programs)

Registrations/Enrollment:

Carrie Stanton

carrie@emt-training.net

(888) 664-4EMT (4368) Main

(702) 489-4232 Fax

Licensure:

Emergent Medical Technologies International, LLC is a Nevada Postsecondary Education institution.

Endorsement:

Emergent Medical Technologies International, LLC is an authorized training center by the Southern Nevada Health District EMS and Trauma System Office.

Institutional Affiliation

University of Nevada Las Vegas (UNLV)

University Medical Center (UMC)

Business Mailing Address:

5546 Camino Al Norte #282, North Las Vegas, Nevada 89031

Mission Statement

Emergent Medical Technologies International, LLC is dedicated to providing the highest quality education available to each student. We believe all students are capable of learning when provided with the proper educational tools and instructors willing to assist them in achieving their educational goals.

Company Goal

It is our goal that any person trained by Emergent Medical Technologies International, LLC will have a diverse knowledge base and will be equipped with the necessary tools to deal with the medical situations they may face.

Emergent Medical Technologies International, LLC will provide the required training to meet stringent requirements found in the various curriculums of all of our course offerings. Our intent is to exceed the requirements set forth by nationally recognized standards and the Southern Nevada Health District EMS and Trauma System Office.

Our curriculum is targeted to educating healthcare professionals of all levels. We believe all students should be proficient in didactic, clinical application and skills. All students should have the ability to understand and treat the underlying processes, which cause the medical conditions that their patients will face.

Emergent Medical Technologies International, LLC incorporates a "human factor" in all our training courses. We believe patients should be treated with respect, dignity and compassion and expect all students to practice these ethics as well.

Logo

The logo of E.M.T. represents the pulse of medical education throughout the world. All humanity experiences illness and injury. All communities strive to have a system to assist others with their medical needs. The foundation for any emergency medical services system is education. The patho-physiology of illness and injury remains the same for all. Yet, the available resources throughout the world are vastly different. E.M.T. is dedicated to providing the educational foundation for compassionate people worldwide who want to further develop the emergency medical services in their communities. Education edifies all, without regard to rank, title, geography, language, or socioeconomic status.

Training Locations

In order to provide a wide range of training courses and ensure availability to a diverse customer base, Emergent Medical Technologies maintains three (3) facilities in Southern Nevada.

In addition to providing training at Las Vegas based locations, EMT is able to travel to all 50 states and to customers worldwide. EMT instructors are proficient in both English and Spanish.

Las Vegas, NV 89119

Advanced Cardiac Life Support (ACLS)

Course Objectives: The American Heart Association (AHA) built this course for Healthcare providers who have the need to enhance their skills in the treatment of the adult victim of cardiac arrest or other cardiopulmonary emergencies.

ACLS emphasizes the importance of basic life support to patient survival; the integration of effective basic life support with advanced cardiovascular life support interventions; and the importance of effective team interaction and communication during resuscitation. Students engage in simulated clinical scenarios that encourage active, hands-on participation through learning stations where students will practice essential skills individually, as part of a team, and as a team leader. Realistic simulations reinforce the following key concepts: proficiency in basic life support care; recognizing and initiating early management of peri-arrest conditions; managing cardiac arrest; identifying and treating ischemic chest pain and acute coronary syndromes; recognizing other life-threatening clinical situations (such as stroke) and providing initial care; ACLS algorithms; and effective resuscitation team dynamics.

Audience: For emergency, intensive care or critical care healthcare providers such as physicians, nurses, paramedics, EMT's, respiratory therapists, and other professionals who may need to respond to a cardiovascular emergency.

Prerequisites: Basic knowledge of dysrhythmia recognition (will review during course)

Required Equipment: Current textbook materials

Certification: Students who successfully complete the ACLS Provider course will receive an ACLS course completion card that is valid for two years.

Course Length: 16 Hours

Tuition Cost: \$175

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Basic Life Support (BLS) Healthcare Provider

Course Synopsis: Designed by the American Heart Association, this course is video-based with instructor-led discussion and simulation in regards to victims of heart attack and choking. Students participate in, practice and complete various skills and learning stations.

Course Objectives: This course is designed to teach the skills of CPR for victims of all ages, use of an automated external defibrillator and relief of choking.

Audience: For healthcare providers: EMS personnel, physician assistants, physicians, dentists, dental assistants, nurses, respiratory therapists and others who must have a credential (card) documenting successful completion of a CPR course.

Required Equipment: A student CD, included with the text, contains supplemental information for interested students on topics such as stroke, cardiac arrest and special resuscitation situations. (Text and CD are included with course cost)

Certification: Students who successfully complete the BLS for Healthcare Providers course will receive a course completion card that is valid for two years.

Course Length: 4 Hours

Cost: \$75

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

EMT-Basic

Course Synopsis: Adheres to the US Dept of Transportation EMT-Basic National Standard Curriculum, the EMT training course is approximately 140 hours in length, including both classroom and hands-on training.

Course Objectives: Describe the essential elements for the safe and efficient response to the scene of a medical emergency; perform a thorough patient assessment for signs and symptoms of illness/injury; provide prompt and efficient basic emergency care to the sick and injured; safely handle/prepare the patient for transportation; describe the essential elements of safe and orderly transportation of the patient to the hospital, and the transfer of the patient care to the higher level of care.

Eligibility Requirements: Participants must be at least 17 Years old; be physically capable of performing the essential duties of an EMT; be proficient in reading/writing English; hold a current CPR course completion card.

Required Equipment: Stethoscope, blood pressure cuff, Current Textbook Materials

Certification: At the completion of the program, individuals may be eligible to take the national certification examination, which leads to EMT-Basic certification.

Course Length: 140+ hours

Cost: \$1250

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

EMT-Intermediate

Course Synopsis: Adheres to the US Dept of Transportation EMT-Intermediate National Standard Curriculum, the AEMT training course is approximately 150 hours in length, including both classroom and hands-on training. Recommended 12-24 clinical hours of in-hospital emergency room or ambulance ride time.

Course Objectives: Describe the essential elements for the safe and efficient response to the scene of a medical emergency; perform a thorough patient assessment for signs and symptoms of illness/injury; provide prompt and efficient basic emergency care to the sick and injured; safely handle/prepare the patient for transportation; demonstrate proper intravenous cannulation; demonstrate knowledge of pharmacology and proper administration of medications; demonstrate airway management techniques; describe the essential elements of safe and orderly transportation of the patient to the hospital, and the transfer of the patient care to the hospital staff.

Eligibility Requirements: Possess a current EMT-Basic certification card, be 18 Years old; be physically capable of performing the essential duties of and EMT-Basic; be proficient in reading/writing English; hold a current Health Care Provider CPR card.

Required Equipment: Current Textbook Materials, Stethoscope, Blood Pressure cuff

Certification: At the successful completion of the course, individuals may be eligible for National Registry Advanced EMT examination.

Course Length: 150+ hours

Cost: \$1250

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

EMS-RN

Course Synopsis: The EMS-RN Training Program is based on the most recently published course titled "Air Medical Crew National Standard Advanced Curriculum" by the American Society of Hospital Based Emergency Air Medical Services (ASHBEAMS). The course curriculum was set forth by Southern Nevada Health District Medical Advisor Board and meets the educational requirement for an EMS RN in Clark County, Nevada.

Course Objectives: To prepare experienced nurses to care for patients in the field and transport setting.

<u>Topic</u>	<u>Hours</u>
CCT & EMS: Roles and Responsibilities	3
Mass Casualty Incidents/Triage	2
Hazardous Materials Awareness	4
Airway Management and Ventilation	10
Pharmacology	6
Cardiac Emergencies	10
Respiratory Emergencies	3
Neurological Emergencies	2
Traumatic Emergencies	10
Abdominal Emergencies	2
Endocrine Emergencies/Allergy & Anaphylaxis	2
Behavioral & Psychiatric Emergencies	2
Pediatric Emergencies	8
Obstetrical Emergencies	2
Shock and Vascular Access	2

Course Length: 70 Hours

Prerequisites: Please see Section 900.010 of the below listed SNHD regulation
<http://www.southernnevadahealthdistrict.org/ems/documents/ems/ems-regs.pdf>

Required Equipment: Syllabus information will be provided

Certification: Course completion certificate

Cost: \$1250

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Heartsaver ® CPR and AED

Course Synopsis: The American Heart Association (AHA) designed this flexible classroom-based course. It is ideal for learners who prefer group interaction and feedback from an instructor while learning skills. Each student receives the highest quality course materials to supplement their learning.

Course Objectives: The goals of this course are to teach the skills of CPR for victims of all ages, use of an automated external defibrillator and relief of choking.

Audience: Designed for employee training at companies, corporations, businesses and other entities. For employees and/or designated first responders who have a duty to respond to cardiac emergency because of job responsibilities or regulatory requirements.

Required Equipment: Current textbook materials

Certification: Students who successfully complete the Heartsaver CPR and AED course will be provided with a CPR & AED course completion card

Course Length: 6 Hours

Cost: \$50

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Heartsaver® First Aid with CPR and AED

Course Synopsis: The American Heart Association (AHA) designed this classroom-based course for employee training at companies, corporations, businesses and other entities. For employees and/or designated first responders who have a duty to respond to a first aid or cardiac emergency because of job responsibilities or regulatory requirements.

The goals of this course are to teach the skills of CPR for victims of all ages, use of an automated external defibrillator and relief of choking.

Designed for employee training at companies, corporations, businesses and other entities. For employees and/or designated first responders who have a duty to respond to cardiac emergency because of job responsibilities or regulatory requirements.

Required Equipment: Current Textbook Materials

Certification: Heartsaver First Aid with CPR & AED course completion card

Course Length: 8 Hours

Cost: \$100

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Pediatric Advanced Life Support (PALS)

Course Objectives: Constructed by the American Heart Association (AHA) this course is designed to aid the pediatric healthcare provider in developing the knowledge and skills necessary to efficiently and effectively manage critically ill infants and children, resulting in improved outcomes.

Audience: For pediatricians, emergency physicians, family physicians, physician assistants, nurses, nurse practitioners, paramedics, EMT's, respiratory therapists, and other healthcare providers who initiate and direct advanced life support in pediatric emergencies.

Required Equipment: Current Textbook Materials

Certification: PALS Provider Course Completion Card valid for 2 years

Course Length: 16 Hours (Two days)

Cost: \$175

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Pre-Hospital Trauma Life Support (PHTLS)

Course Synopsis: The Pre-hospital Trauma Life Support (PHTLS) course is a unique continuing education program created in recognition of the real need in EMS education for additional training in the handling of trauma patients. This indispensable program is designed to enhance and increase knowledge and skill in delivering critical care in the pre-hospital environment.

Course Objectives: PHTLS courses goals are to improve the quality of trauma care in your area and decrease mortality. The program is based on a pre-hospital trauma care philosophy, stressing the treatment of the multi-system trauma patient as a unique entity with specific needs. This may require an approach to the trauma patient that varies from traditional treatment modalities.

Audience: EMS Providers

Required Equipment: Current Textbook Materials

Certification: PHTLS Course Completion Certificate/Card valid for 4 yrs

Course Length: 16 Hours (2 Days)

Cost: \$175

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Trauma Nurse Core Course (TNCC)

Course Synopsis: Emergency Nurses Association (ENA) developed and implemented the TNCC for national and international dissemination as a means of identifying a standardized body of trauma nursing knowledge. The TNCC (Provider) is a 16-hour course designed to provide the learner with cognitive knowledge and psychomotor skills.

Course Objectives: Trauma nursing as a discipline refers to the process and content of all the different roles nurses have in the care of the trauma patient. Knowledge is the core of any discipline. The purpose of TNCC is to present core-level knowledge, refine skills, and build a firm foundation in trauma nursing.

Audience: The TNCC may be officially attended by registered nurses (RN's). Other health care providers may attend the course as observers.

Prerequisites: Current RN license

Required Equipment: Current Textbook Materials

Certification: ENA/TNCC Course Completion Card valid for four years

Course Length: 16 Hours (Two days)

Cost: \$220

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Advanced Cardiac Life Support (ACLS) Refresher Course

Course Objectives: The American Heart Association (AHA) built this refresher course for Healthcare providers who have the need to maintain their skills in the treatment of the adult victim of cardiac arrest or other cardiopulmonary emergencies.

Students engage in simulated clinical scenarios that encourage active, hands-on participation through learning stations where students will practice essential skills individually, as part of a team, and as a team leader. Realistic simulations reinforce the following key concepts: proficiency in basic life support care; recognizing and initiating early management of peri-arrest conditions; managing cardiac arrest; identifying and treating ischemic chest pain and acute coronary syndromes; recognizing other life-threatening clinical situations (such as stroke) and providing initial care; ACLS algorithms; and effective resuscitation team dynamics.

Audience: Designed for persons who have previously attended the AHA ACLS program and require a refresher program. This course is for emergency, intensive care or critical care healthcare providers such as physicians, nurses, paramedics, EMT's, respiratory therapists, and other professionals who may need to respond to a cardiovascular emergency.

Prerequisites: Must have previously completed an AHA ACLS course and have current ACLS and BLS course completion cards

Required Equipment: Current Textbook Material

Certification: ACLS Provider Course Completion Card valid for 2 years

Course Length: 8 Hours

Cost: \$125

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Basic Life Support (BLS) Healthcare Provider Refresher

Course Synopsis: The course is video-based with instructor-led discussion and simulation in regards to victims of heart attack and choking. Students participate in, practice and complete various skills and learning stations.

Course Objectives: This course is designed to teach the skills of CPR for victims of all ages, use of an automated external defibrillator and relief of choking.

Audience: For healthcare providers who have previously attended the 4 hour CPR/Healthcare Provider course and need their credentials updated-for example, EMS personnel, physician assistants, physicians, dentists, nurses, respiratory therapists and others who must have a credential (card) documenting successful completion of a CPR course.

Prerequisites: Current BLS Course Completion Card

Required Equipment: Current Textbook Materials

Certification: BLS for Healthcare Providers Course Completion Card valid for two yrs

Course Length: 2 Hours

Cost: \$50

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Emergency Medical Technician: Basic Refresher Course

Course Synopsis: This course is the required course for the EMT seeking to recertify. The course is based on the Department of Transportation's (DOT) 1994 EMT-Basic curriculum.

This course is a minimum of 24 hours in length and consists of lecture or online sessions, along with practical sessions. The material covered in this course is divided into 7 modules. They are as follows: Preparatory, Airway Management, Patient Assessment, Medical Emergencies, Trauma Emergencies, Infants and Children and Operations. This course satisfies the core continuing education requirements for National Registry recertification.

<u>Prerequisites:</u>	Hold a current EMT-Basic License
<u>Required Equipment:</u>	Note taking material
<u>Certification:</u>	Meets core renewal education requirement NREMT-Basic Certification*
<u>Course Length:</u>	24 Hours (3 Days)
<u>Cost:</u>	\$200
<u>Minimum capacity seating:</u>	6 Course Participants
<u>Maximum capacity seating:</u>	24 Course Participants

*Note: 48 Additional hours of Continuing Medical Education (CME) per NREMT standards are required to fully complete the recertification process.

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Emergency Medical Technician: Intermediate Refresher Course

Course Synopsis: This course is the required course for the EMT seeking to recertify. The course is based on the Department of Transportation's (DOT) 1994 EMT-Intermediate curriculum.

Course Objectives: This course is a minimum of 36 hours in length and consists of lecture and practical sessions. The material covered in this course is divided into 7 modules. They are as follows: Preparatory, Airway Management, Patient Assessment, Medical Emergencies, Trauma Emergencies, Infants and Children and Operations. This course satisfies the core continuing education requirements for National Registry recertification.

Prerequisites: Current EMT-Intermediate Certification

Certification: Course completion certificate*

Course Length: 36 hours (Four 9 hour days)

Cost: \$300

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

*Note: 36 Additional hours of Continuing Medical Education (CME) per NREMT standards are required to fully complete the recertification process.

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Emergency Medical Technician Paramedic Refresher Course

Course Synopsis: This course is the required course for the EMT seeking to recertify. The course is based on the Department of Transportation's (DOT) 1994 EMT-Paramedic curriculum.

Course Objectives: This course is a minimum of 48 hours in length and consists of lecture along with practical sessions. The material covered in this course is divided into 7 modules. They are as follows: Preparatory, Airway Management, Patient Assessment, Medical Emergencies, Trauma Emergencies, Infants and Children and Operations. This course satisfies the core continuing education requirements for National Registry recertification.

Required Equipment: Current Paramedic License

Certification: Course Completion Certificate*

Course Length: 48 hours (Five ten-hour days)

Cost: \$450

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

*Note: 24 Additional hours of Continuing Medical Education (CME) per NREMT standards are required to fully complete the recertification process.

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Pediatric Advanced Life Support (PALS) Refresher Course

Course Objectives: Constructed by the American Heart Association (AHA), this course is designed to aid the pediatric healthcare provider in developing the knowledge and skills necessary to efficiently and effectively manage critically ill infants and children, resulting in improved outcomes.

Audience: Established for persons who have previously attended the AHA PALS program and require a refresher program. Candidates must possess a current PALS card. This course is for pediatricians, emergency physicians, family physicians, physician assistants, nurses, nurse practitioners, paramedics, EMT's, respiratory therapists, and other healthcare providers who initiate and direct advanced life support in pediatric emergencies.

Prerequisites: Must have previously completed an AHA PALS course and have current PALS and BLS course completion cards.

Required Equipment: Current Textbook Materials

Certification: PALS Provider Course Completion Card valid for 2 years

Course Length: 8 Hours (One day)

Cost: \$125

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Pre-Hospital Trauma Life Support (PHTLS) Refresher Course

Course Synopsis: The Pre-hospital Trauma Life Support (PHTLS) course is a unique continuing education program created in recognition of the real need in EMS education for additional training in the handling of trauma patients. This indispensable program is designed to enhance and increase knowledge and skill in delivering critical care in the pre-hospital environment.

Course Objectives: PHTLS courses goals are to improve the quality of trauma care in your area and decrease mortality. The program is based on a pre-hospital trauma care philosophy, stressing the treatment of the multi-system trauma patient as a unique entity with specific needs. This may require an approach to the trauma patient that varies from traditional treatment modalities.

Audience: Must have previously completed an NAEMT PHTLS course and have a current PHTLS course completion card.

Required Equipment: Current Textbook Materials

Certification: PHTLS Course Completion Certificate/Card valid for 4 yrs

Course Length: 8 Hours (1 Day)

Cost: \$125

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Advanced Cardiac Life Support (ACLS) Instructor Certification

Course Synopsis: The purpose of an ACLS Instructor Course is to develop proficiency in teaching, organizing and conducting a provider course. ACLS Instructors must have a firm working knowledge of the ACLS material. They are also expected to demonstrate in-depth factual knowledge of emergency cardiac care. Participants learn to design a provider course to meet the needs of a particular student population. Currently accepted principles of adult learning, the use of interactive teaching strategies, and the ability to sequence instruction and evaluate progress are essential parts of the course.

Course objectives include preparation of instructor candidates to:

1. Create an environment conducive for students to learn the ACLS provider material
2. Provide encouragement to the students and fellow instructors.
3. Maintain and improve both communication and Advanced Cardiac Life Support skills.

Prerequisites: Must hold current BLS and ACLS Provider cards.
Instructor Potential recommendation form

Required Equipment: Current Textbook Materials

Certification: ACLS Instructor Card valid for 2 years

Course Length: 8 hours

Cost: \$300

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Basic Life Support (BLS) Instructor Certification

Course Synopsis: The Instructor Course is designed to prepare AHA instructors to disseminate the science, skills, and philosophy of resuscitation programs to participants enrolled in AHA courses.

Course Objectives: AHA instructors are the best tool the AHA has to fulfill its mission- to reduce disability and death caused by heart disease and stroke. The more skilled instructors the AHA ECC Programs have, the more participants will be trained in CPR and ECC. By increasing the number of bystanders prepared and willing to activate the EMS system and provide CPR, early defibrillation, and advanced life support, the AHA will be able to significantly reduce disability and death from heart attacks, cardiac arrest, and stroke.

Prerequisites: Must possess current BLS Provider Card
Instructor Potential recommendation form

Required Equipment Current Textbook Materials

Certification: BLS Instructor Card Valid for 2 years

Course Length: 8 hours

Cost: \$300

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

American Heart Association: Pediatric Advanced Life Support (PALS) Instructor Certification

Course Synopsis: The purpose of a PALS Instructor Course is to develop proficiency in teaching, organizing and conducting a provider course. PALS Instructors must have a firm working knowledge of the PALS material.

Course Objectives: Participants are expected to demonstrate an in-depth knowledge of emergency cardiac care. Currently accepted principles of adult learning; the use of interactive teaching strategies; and the ability to sequence instruction and evaluate progress are essential parts of the course.

Prerequisites: Must possess current BLS and PALS Provider Cards
Instructor Potential recommendation form

Required Equipment Current Textbook Materials

Certification: PALS Instructor Card Valid for 2 years

Course Length: 8 hours

Cost: \$300

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Secondary EMS Instructor

Course Synopsis: This course is the initial 24 hours of educational requirement for endorsement as a Secondary EMS Instructor by the Southern Nevada Health District EMS and Trauma System Office for EMS personnel in Southern Nevada.

Course Objectives: Provide foundational principles for EMS education for a new EMS educator in: philosophy, standards, ethics, legal issues, competencies, cognitive and psychomotor aspects.

Audience: Public health professionals with an aptitude for teaching others.

Prerequisites: See the Southern Nevada Health District's EMS Regulations and Procedures at www.southernnevadahealthdistrict.org (emergency medical services link).

Required Equipment: Note taking equipment

Certification: Secondary EMS Instructor Certification with SNHD

Course Length: 3 Days

Cost: \$600

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Primary EMS Instructor

Course Synopsis: This course is the final 16 hours of educational requirement for endorsement as a Primary EMS Instructor by the Southern Nevada Health District EMS and Trauma System Office for EMS personnel in Southern Nevada.

Course Objectives: Prepare instructors for EMS education management: Curriculum and course development, administration, assessment and evaluation, classroom and clinical teaching.

Audience: Public health professionals with an aptitude for teaching others.

Prerequisites: Must maintain Secondary EMS Instructor status for at a minimum of one year. See the Southern Nevada Health District's EMS Regulations and Procedures at www.southernnevadahealthdistrict.org (emergency medical services link).

Required Equipment: Note taking equipment

Certification: Primary EMS Instructor Certification with SNHD

Course Length: 2 Days

Cost: \$400

Minimum capacity seating: 6 Course Participants

Maximum capacity seating: 24 Course Participants

Find enrollment instructions and the most updated course schedule @ www.emt-training.net

Emergency Medical Technician-Basic ONLINE - UNLV

Course Synopsis: The ONLINE EMT-Basic training course is open for enrollment at the beginning of each month and is self-paced. Students have up to 1-year to complete both the online and Skills Boot Camp* portions of the program. This course exceeds the National Standard Curriculum criteria.

Course Objectives: Describe the essential elements for the safe and efficient response to the scene of a medical emergency; perform a thorough patient assessment for signs and symptoms of illness/injury; provide prompt and efficient basic emergency care to the sick and injured; safely handle/prepare the patient for transportation; describe the essential elements of safe and orderly transportation of the patient to the hospital, and the transfer of the patient care to the hospital staff.

Audience: Any person worldwide that meets the minimum eligibility requirements and has an interest in becoming an Emergency Medical Technician-Basic.

Eligibility Requirements: 18 Years old; be physically capable of performing the essential duties of and EMT-Basic; be proficient in reading/writing English; hold a current CPR course completion card.

Required Equipment: Computer with Internet capability

Certification: Upon successful completion of the program, individuals may be eligible to take the National certification examination, which leads to EMT-Basic certification.

Course Length: Self-paced, maximum one year to complete full course including skills boot camp

Cost: \$1750

Enrollment: Students can only sign up for this course by contacting the UNLV Educational Outreach office during normal business hours @ (702) 895-3394 or by going to the UNLV Educational Outreach/Continuing Education website: <http://edoutreach.unlv.edu/continuingeducation/>

*Students must also sign up for and complete the Skills Boot Camp conducted in Las Vegas, NV in order to complete the UNLV ONLINE EMT-B course curriculum.

EMT-Basic Skills Boot Camp*

Course Synopsis: This course is designed as the “capstone” class for prospective UNLV Online EMT-Basic students. Students should come to this training session ready to work in an EMT environment by performing medical skills and by demonstrating the knowledge and ability to act as an Emergency Medical Technician in the field setting.

Course Objectives: This course will prepare each student for the application of EMT field skills and for National Registry EMT testing.

Audience: Applicants for this course **MUST** be currently enrolled in the UNLV Online EMT-B course. This is not an open enrollment course.

Prerequisites: Must have successfully completed the UNLV Online EMT-B program

Required Equipment: Stethoscope, Blood Pressure Cuff. Please read dress code requirements in student handbook. These items will be available for purchase at the Boot Camp site.

Certification: Successful completion of this program, along with the ONLINE UNLV portion of the course may enable students to take the National Registry EMT test for certification.

Course Length: 5 days

Cost: Included with UNLV Online course tuition

*EMT-Basic Online Information: For information on the online EMT-Basic course offered through UNLV, please contact the UNLV Educational Outreach office during normal business hours @ (702) 895-3394 or by going to the UNLV Educational Outreach/Continuing Education website: <http://edoutreach.unlv.edu/continuingeducation/>

Advanced TAC-MED

Course Synopsis: Designed specifically for USSOCOM medics, this course has four main goals:

1. Reinforcement and “hands-on” proficiency testing of all tactical & medical skills required of the worlds most elite combat medics
2. Achieve **ALL** required CME’s & certifications required of Nat’l Registry of EMT’s
3. Team Building and Inter-Service Operability of SOF assets
4. Strengthen and improve existing firearm skills and ground tactics

Who is allowed to attend the Advanced Tac-Med?:

Current USAF Pararescuemen
Current FBI HRT Medics
Current US Navy SEAL Corpsmen
Current US Navy IDC’s (MARSOC)
Current US Army 18-delta Medics
Current US Army Ranger Medics

*Former SOF Medics
*Law Enforcement Tactical Medics
*NATO Country SOF Medics

** Must submit background questionnaire*

Medical professionals who want to take part in a JTM TAC-MED program, but are not qualified to attend the Advanced TAC-MED course may attend the Intermediate TAC-MED.

Course Objectives: Upon completion each student will achieve **ALL** required CME’s & certifications required of National Registry of EMT’s.

Prerequisites: This school is PHYSICALLY DEMANDING! Prospective applicants will be expected to lift heavy objects, function in confined spaces, and be required to shoot/move/communicate under stressful conditions. Intermediate TAC-MED

Note: The "Intermediate Tac-Med" (ITM) has the exact same medical curriculum as the "Advanced TAC-MED" (ATM) course. The firearms and ground tactics portions is geared for students who wish to develop a higher degree of tactical experience.

ATM attendees are expected to come completely proficient in advanced weapons handling techniques, ground tactics and TCCC concepts. NON-SOCOM medics, nurses, physicians, etc. are **not** allowed to attend the ATM without specific approval from the JTM training director. Any current medical professional with "tactical" experience is allowed to attend the Intermediate TAC-MED (ITM) program.

Course Synopsis: Designed for current medical professionals with limited "tactical" backgrounds, this course has four main goals:

1. Instruct proven tactical & medical skills required of the tactical EMS providers
2. Achieve **ALL** required CME's & certifications required of Nat'l Registry of EMT's
3. Team Building and Inter-Service Operability
4. Teach advanced firearm skills and ground tactics in regards to military medicine

Course Objectives: Upon completion each student will achieve **ALL** required CME's & certifications required of National Registry of EMT's.

Prerequisites: This school is PHYSICALLY DEMANDING! Prospective applicants will be expected to lift heavy objects, function in confined spaces, and be required to shoot/move/communicate under stressful conditions. Each student is expected to be FAMILIAR in safe handling and shooting with a semi-automatic pistol and M16/M4 type rifle. Students must also be physically capable of quickly and safely assuming standing, kneeling, and prone positions, maintaining them for a period of time, in adverse conditions, and recovering without assistance.

Required Equipment: Refer to the School Announcement which can be found on the JTM Training Group website: www.jtmlasvegas.com

Certification: BLS/CPR-HCP, ACLS, PHTLS, PALS

Course Length: 12 Days

Cost: \$2500 plus ammunition requirements

Minimum capacity seating: 10 Course Participants

Maximum capacity seating: 24 Course Participants
